

TO INCREASE SOIL PH

General Information

DuraTurf Turf Turbo is ideal for turf and horticultural application.

DuraTurf Turf Turbo will supply calcium to the soil while raising soil pH.

Low pH can cause moss, weeds and bare spots in your lawn. Apply this product where moss grows to improve desirable grass growth.

Most common lawn grasses require a soil pH between 6.8 to 7.2, DuraTurf Turf Turbo helps balance soil pH allowing your lawn to grow thick and healthy.

Limitations, Restrictions, and Exceptions

APPLICATION RECOMMENDATION

Application rate depends on your soil test results. In the absence of a soil test use the following application rates.

- To increase soil pH, under adverse soil conditions and to increase calcium in the soil profile, apply 12 lbs. per 1,000 sq ft or 520 lbs per acre. Up to 3 applications per year, applied 8 weeks apart, is recommended for low pH soils.

30 lb. bag covers 2,500 sq. ft.
