

COTTON

General Information

Fertigation

Application of Phytamin All Purpose is safe through most types of irrigation equipment including drip tape and aluminum pipe.

Phytamin All Purpose may not pass through some drip type irrigation systems.

Always flush irrigation lines after Phytamin treatment to prevent possible clogging or corrosion.

Always inject Phytami products in front of any filter system.

Phytamin All Purpose is mildly corrosive to aluminum in a concentrated form.

Not recommended for use in hydroponics. Please contact the manufacturer for information on special formulations.

DIRECTIONS FOR USE

Mix well before use.

Other Crops

Application Rates: Phytamin All Purpose may be used successfully on most crops.

Please consult your dealer for rates and timing of applications.

Limitations, Restrictions, and Exceptions

Cotton

To improve production, Phytamin All Purpose should be applied as a foliar spray during the early bloom stages of growth.

Application Rates: $\frac{1}{2}$ - 2 gallons per acre in sufficient water to assure thorough coverage. Begin treatments at first bloom up to 3 weeks after first bloom.

Treatments may be made up to three times at 10 day intervals.
