

# TREES, FRUIT AND NUTS

## General Information

### Fertigation

Application of Phytamin is safe through most types of irrigation equipment including drip tape and aluminum pipe.

Phytamin may not pass through some drip type irrigation systems. Always flush irrigation lines after Phytamin treatment to prevent possible clogging or corrosion.

Always inject Phytamin products in front of any filter system Phytamin is mildly corrosive to aluminum in a concentrated form.

### DIRECTIONS FOR USE

Mix well before use.

### Other Crops

Application Rates: Phytamin may be used successfully on most crops. Please consult your dealer for rates and timing of applications.

### Limitations, Restrictions, and Exceptions

#### Trees, Fruit & Nuts

Application Rate: ½ - 1 gallon per acre applied in ample water to provide for thorough coverage. Begin treatments between first bloom and full bloom. Repeat treatments as necessary. Recommendations are for almonds, walnuts, stone fruits, apples, pears and pomegranates.
