

VEGETABLES

General Information

Fertigation

Application of Phytamin is safe through most types of irrigation equipment including drip tape and aluminum pipe.

Phytamin may not pass through some drip type irrigation systems. Always flush irrigation lines after Phytamin treatment to prevent possible clogging or corrosion.

Always inject Phytamin products in front of any filter system Phytamin is mildly corrosive to aluminum in a concentrated form.

DIRECTIONS FOR USE

Mix well before use.

Other Crops

Application Rates: Phytamin may be used successfully on most crops. Please consult your dealer for rates and timing of applications.

Limitations, Restrictions, and Exceptions

Vegetables

Do not apply as a foliar fertilizer to lettuce or other leaf crops.

Yield and quality may be improved by regular treatments of Phytamin throughout the growing period.

Application Rates: $\frac{1}{2}$ - 1 gallon per acre in sufficient water for thorough coverage. Treatments should be made after thinning at 10 to 14 day intervals.
