

SOIL APPLICATION

General Information

MaxxGro for Peanuts is specifically formulated for use on peanut crops requiring a balanced fertility program. MaxxGro for Peanuts contains a trace element package designed to supply the micronutrients required by peanuts in the precise ratio needed based on crop uptake and efficiency factors specific to the crop. MaxxGro for Peanuts contains penetration and translocation aids as well as humectants and growth enhancement compounds to enable nutrients to move into the plant system more easily. MaxxGro for Peanuts is formulated for both soil and foliar applications. It may be applied in foliar applications to growing crops alone or with crop protection or other nutritional products and may also be applied directly to soil alone or with crop protection products or fertilizers. It is ideally suited for use in any starter fertilizer program. MaxxGro for Peanuts is compatible with most all crop protection and nutritional products and may be applied by conventional, low-volume or air application. MaxxGro for Peanuts promotes crop health and proper fertility in high level crop management programs and in programs designed to enhance yield and quality.

DIRECTIONS FOR USE

MaxxGro for Peanuts may be used in soil or through foliar applications. For foliar use, multiple applications are generally more effective than a single application. It is recommended that a soil analysis be used to determine specific application rates. This product is compatible with most pesticides and fertilizers.

MIXING

MaxxGro for Peanuts is compatible with most crop protection and nutritional products: Follow crop protection label for mixing instructions with nutritional products. A compatibility test is recommended.

If liquid fertilizer is the carrier or other nutritional products are part of the carrier, add them and agitate. When using liquid fertilizer as the carrier or when using other nutritional products as part of the carrier use a quality compatibility agent such as Co-Mix at a rate of 1-2 pts/100 gallons of carrier. Check crop protection labels for

language regarding using water slurries with dry or encapsulated products.

Then:

- Put 1/3 Water/carrier in Tank
- Add Crop Protection Products
- Fill tank with balance of water and/or carrier
- Add MaxxGro for Peanuts
- Agitate

Always mix well to insure proper distribution during application

Limitations, Restrictions, and Exceptions

SOIL APPLICATION

MaxxGro for Peanuts may be soil applied. Broadcast, or band with water and/or pre-emerge herbicides and nitrogen solutions. MaxxGro for Peanuts may be added to any in-furrow or starter program. Crops with severe deficiencies may require supplemental side dress soil applications of MaxxGro for Peanuts to maintain proper concentrations in the soil. For best results when soil applied, split applications should be utilized.
