

FOR USE AS FERTILIZER

General Information

DIRECTIONS FOR USE

BRANDT INHANCE is a water conditioning agent designed for use with herbicides that recommend or require the addition of ammonium sulfate. BRANDT INHANCE improves herbicide performance by increasing uptake and reducing herbicide antagonism.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with BRANDT INHANCE. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: BRANDT INHANCE is compatible with most fertilizers and pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

MIXING: Shake well before using. Fill spray tank 1/2 full of water and begin agitation. Add the recommended amount of BRANDT INHANCE. Add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersible granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

RECOMMENDATIONS: Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

Limitations, Restrictions, and Exceptions

For Use as a Fertilizer: Use 1-2 quarts per 10-20 gallons of water per acre per application.
