

FRUIT, TREE AND VINE CROPS

General Information

General Information

BRANDT GH products may be used on all field, row, vegetable, fruit, tree and vine crops, and turf and ornamentals for the prevention and correction of micronutrient deficiencies when used as part of a balanced fertility program.

Mixing and Handling Instructions

Apply in a minimum of 10 gallons water per acre for ground spray equipment or 2 gallons water per acre for aerial application. This product may also be applied via drip or sprinkler fertigation.

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application. Be cautious when mixing this product with phosphate solutions.

Limitations, Restrictions, and Exceptions

Fruit, Tree and Vine Crops: Post-bloom applications to the spring flush give best results. Apply 1-2 quarts per acre in sufficient water to assure thorough coverage.
