VEGETABLES, EVERGREEN TREES, CORN/SWEET CORN AND TREE FRUIT

General Information

DIRECTIONS FOR USE:

Add CORONA N first in a 3/4 tank water and agitate while mixing. Keep agitating until the end of the dissolution.

Apply Corona N dissolved in the treatment water Foliar fertilization is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by crops or other intended plants. Do not spray during periods of frost. In hot conditions spray at the beginning or at the end of the day.

Method
Spray
