

BARLEY, OATS, AND WHEAT

Limitations, Restrictions, and Exceptions

This product is for use as a preplant starter. It can be used on but is not limited to the following:

Barley, Oats and Wheat: apply 390 ml of undiluted product per 100 kg of seed, based on the results of testing on wheat.

DILUTION: AWAKEN ST can be diluted to adequate volume for better seed coverage. Depending on seed size and use rates, it can be diluted with water or seed treatments up to 650 ml/100 kg seeds of cereals. Dilution with water may be desirable. If it is mixed with compatible pesticide or fertilizer, mix only enough material for use on the day of application. Apply the mixture to seed as soon as possible.
