

## **SUGGESTED USE RATES - PREVENTATIVE**

### General Information

General: E-Z MIX is a highly concentrated compatibility agent for direct addition to liquid fertilizers when a stable mixture of pesticides and liquid fertilizer is to be applied in combination.

Directions for Use: E-Z MIX is soluble in liquid fertilizers. For best results, E-Z MIX should be added to the fertilizer before addition of the required amount of pesticides. Agitate while adding the rate suggested. Continue agitation when adding the required amount of pesticide and continue mixing several minutes before application.

### Limitations, Restrictions, and Exceptions

Preventative: Add 1.23 to 2.5 litres/1000 liters of solution while agitating the mixture (0.125% to 0.25% v/v).
