

APPLE - SCAB

Limitations, Restrictions, and Exceptions

For scab apply 1.25 - 2 kg FERBAM 76 WDG in a regular protective schedule from green tip up to and including second cover spray. After the second cover spray reduce rate to 1 kg per 1000 liters if scab is at a low level in the orchard.

May cause russetting of Golden Delicious, Jonathon, and other sensitive varieties.

Pre-Harvest Interval

7 days
