DIRECTIONS FOR USE

For best results apply when the temperature is 20°C or higher. Use sufficient volume of spray per hectare for good coverage of all plant parts. For tree fruits, approximately 3000 litres of dilute spray or an equivalent amount of material as a concentrate spray per hectare, for vegetables 1000 litres dilute spray per hectare. For proper timing of the application, follow the Provincial Spray Guides. Repeat at 10 - 12 day intervals or as necessary.
