

PART A - TO CONTROL GRASS AND WEEDS

General Information

PRODUCT INFORMATION

WEED SLAYER is a unique broad spectrum natural herbicide made from a blend of Part A (Eugenol an essential oil of Clove and molasses) and Part B (a strong natural and proprietary bio surfactant)

WEED SLAYER can be applied to control grass and weeds. Results are normally seen in less than a week but can take up to 10 to 14 days. Residuality can be expected to last for several weeks but should not affect new crops.

WEED SLAYER is exempted from EPA registration under FIFRA 25 (b).

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE:

Mix 32 ounces of PART A per acre and 32 ounces of PART B per acre into 25 gallons and up to 50 gallons of water per acre. Make sure to agitate and empty every jug thoroughly. When applying, make sure to protect all desirable crop or plants from overspray as WEED SLAYER will affect them. SHAKE BEFORE USE.
