

## **SOIL APPLICATION**

### General Information

#### GENERAL INFORMATION

Zinc 9% is recommended to correct zinc deficiencies. Zinc 9% should be used on the basis of a soil and/or tissue analysis.

#### MIXING INSTRUCTIONS

1. Pour 1/3 water or fertilizer in tank
2. Add other pesticides\*
3. Fill tank with a balance of water of fertilizer
4. Add Zinc 9%
5. Agitate to assure proper mixing

\*CAUTION: Check compatibility with orthophosphate fertilizers and other chemicals prior to mixing.

#### Limitations, Restrictions, and Exceptions

#### DIRECTIONS FOR USE

##### Soil Application:

Formulated and compatible for use in all liquid suspension fertilizers.

Use recommended rates only from a soil or plant analysis where is required by law.
