

# TURF

## General Information

Professional- choice turf paint

- Recommended for professional athletic fields
- Non-phytotoxic to turf
- Superior formulation for reduced rub off on uniforms
- Contains no hazardous chemicals or heavy metal

Before applying Green Lawngr Lineman Pro Green, cut turf to desired height. One gallon (3.78 L) of Lineman Pro Green will cover 2,000 - 4,000 sq ft (186- 372 m<sup>2</sup>) of turf. Typically a 1:4 - 1:5 colorant-to-water ratio is recommended depending on desired color.

Equipment Notice: BASF recommends the use of Teflon seals to aid in the prevention of leaks when using Lineman Pro Green in centrifugal pumps. Standard ceramic seals may leak during operation.

## Application Tips:

A spray shield is recommended for applications if overspray or drift is a potential problem. If this product is mixed with pesticides, the entire mixture, including rinsate, must be handled and disposed of according to all applicable local, State, and Federal guidelines.

## Method

[Spray](#)

Restricted Entry Interval

## Directions For Use

Shake well. Dilute one gallon (3.78 L) of Lineman Pro Green with 4 to 5 gallons (15-19 L) of water.

For a darker turf color, apply a second coat 24 hours after first application. Best results are obtained by making two lighter applications, (versus one heavier application).

Allow the first application to dry before the second application. Second application should be made perpendicular to the first application pattern. Utilize flat fan spray tips and small spray droplets to achieve uniform coverage.
