

FOR 8 ACRE FOOT

General Information

Blue colorant for lakes, ponds and fisheries in easy-to-use, water-soluble packets

- Easy to use
- Pre-measured, water-soluble packets
- For use in ornamental lakes, ponds and fisheries
- Transforms pale, dirty, off-colored water

Lake Colorant WSP is a concentrated blend of dry-flowable colorants in easy-to-use, pre-measured Water Soluble Packets (WSP). Lake Colorant WSP conveniently transforms pale, dirty, off-colored water into natural blue. Lake Colorant WSP may be used to color ornamental lakes, ponds, fisheries, fountains and other contained bodies of water. Water treated with Lake Colorant WSP may be used for irrigation, but not for direct human consumption. Swimming and other recreational sports are approved during and following use of this product. Fish, waterfowl or animals are not harmed by normal use of this product.

Directions For Use

Determine the volume of water to be treated and consult the Usage Rates chart to determine the number of WSPs to use. Use one WSP for each acre foot* of water. If a darker or lighter color is desired, vary the rate accordingly. Toss or drop the correct number of packets into the water. Evenly spaced packets aid in quicker, more even coverage.
