

FOR USE WITH ACARACIDES, INSECTICIDES, FUNGICIDES HERBICIDES, AND DEFOLIANTS

General Information

GENERAL INFORMATION

UNIFAST-B is designed to increase wetting and give a more uniform coverage. When used with systemic or translocated material, UNIFAST-B increases absorption and aids in the translocation of certain herbicides, insecticides and miticides. UNIFAST-B is a combination spreader, activator, and buffer with non-foaming properties. UNIFAST-B is an 80% active non-ionic surfactant and is 8% active as a buffer. UNIFAST-B provides wetting, pH adjustment and also acts as an anti-foam agent.

DIRECTIONS FOR USE

This product may be used in dilute or concentrate sprays. Add UNIFAST-B to spray tank first.

Rates Per 100 gallons or less of spray mix.

Note: The use recommendations are considered to be adequate for most uses. Some pesticides, however, may require higher rates for optimum effect. Follow the pesticide label directions when this occurs. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

NOTE: Rates vary with the pH of the spray water. Spray water pH levels can be lowered by adding UNIFAST-B until the most effective pH level as recommended by the chemical manufacturer is achieved. If these levels are not known, consult the chemical manufacturer.
