

DECIDUOUS FRUIT AND NUT CROPS

General Information

GENERAL INFORMATION

NUTRA-BUILDER 18-8-18 is a water soluble foliar fertilizer containing nitrogen, phosphorus, potassium that is recommended to be used as a supplement to a regular fertility program. Do not apply to crops during periods of stress.

CAUTION: Avoid applications with highly alkaline materials such as lime sulfur or spray lime. Do not combine with dormant oil. The use of this fertilizing material on any crops other than those recommended may result in serious injury to the crop.

DIRECTIONS

Add NUTRA-BUILDER 18-8-18 to the spray tank when half full. Agitation in the tank will enhance the speed of solubility. Allow extra time for higher rates and areas with extremely cold water to completely solubilize before spraying.

Limitations, Restrictions, and Exceptions

Deciduous Fruit and Nut Crops: Apply as pre-bloom and post bloom sprays. Do not apply during bloom period or under poor drying conditions. Do not apply with other materials that may cause russetting. Do not apply to Anjou pears when above 80°F and/or after fruit turn down.
