TURF - BROWN PATCH (PREVENTIVE)

General Information

USE INFORMATION
Pedigree Fungicide SC is a systemic fungicide for control of Brown Patch (Rhizoctonia solani), Brown Ring Patch (Waitea circinata var. circinata), Fairy Ring, Red Thread (Laetisaria fuciformis), Pink Patch (Limonomyces roseipellis), Yellow Patch (Rhizoctonia cerealis), Gray snow mold (Typhula spp.), Large Patch (Rhizoctonia solani AG 2-2LP) and Leaf and Sheath spot (Rhizoctonia zeae, Rhizoctonia oryzae), Southern blight (Sclerotium rolfsii).

If other diseases are present in the field, Pedigree Fungicide SC can be tank mixed with other fungicides registered for use on those diseases.

Not for sale, sale into, distribution, and or use in Nassau and Suffolk counties of New York State.

RESISTANCE MANAGEMENT
The active ingredient in Pedigree Fungicide SC is flutolanil and belongs to the succinate dehydrogenase inhibitor class (FRAC Group 7). Because resistance development cannot be predicted, the use of this product should conform to resistance management strategies established for the crop and use area. Such strategies may include rotating and/or tank mixing with products having different modes of action or limiting the total number of applications per season. PBI-Gordon Corporation encourages responsible product stewardship to ensure effective long-term control of the fungal diseases on this label.

PEDIGREE FUNGICIDE SC APPLICATION RATE CHART FOR TURF
Use Information
Pedigree Fungicide SC is a systemic fungicide for control of Basidiomycete diseases on turf. This product has shown excellent safety on Kentucky bluegrass, annual bluegrass, annual and perennial ryegrass, red fescue, tall fescue, bentgrass, Bermudagrass, zoysiagrass, and St. Augustine grass.

Use Restrictions for Turf Application
For use rates greater than 4.4 fl.oz. per 1,000 square feet, do not apply Pedigree
Fungicide SC within 100 feet of any freshwater or marine estuary, ditches, drainage tiles, or other waterway that drains directly (within ½ mile) into estuaries. Do not apply more than 13.25 fl. oz. per 1,000 square feet per calendar year as a broadcast application.

Applications
Apply Pedigree Fungicide SC at the dosage rates in the table below as a broadcast application in 2 to 5 gallons of water per 1,000 square feet. For best results, avoid mowing within 24 hours after application. Do not irrigate until sprays have dried. Pedigree Fungicide SC may be tank mixed with other labeled fungicides if other diseases not listed on this label are present.

Limitations, Restrictions, and Exceptions

Use Directions
- Apply by broadcast application using 2 to 5 gallons of water prior to disease development.
- Repeat application after a 14 to 21 day interval if conditions favor disease development.

Spray Interval (Days) - 14 to 21

Method
Broadcast Application

Restricted Entry Interval
12 hours

Timings
Prior to disease development.
