

FOLIAR APPLICATION

General Information

COMPATIBILITY

CM 1-0-3 with 5% Zn is compatible with most pesticides, fertilizers, insecticides and fungicides with the exception of spray oils and compounds containing sabadilla used on citrus. Caution should be used with copper fungicides as this material may increase their solubility. Do not apply during bloom. A simple jar test is recommended before any large scale mixing.

Limitations, Restrictions, and Exceptions

Foliar Application:

Apply as needed on a 10 - 14 day schedule.

When rates of over 2 quarts are required, split applications of 2 quarts or less are recommended. Avoid foliar applications of when plants are under stress due to lack of moisture.
