

FOR INDOOR USE ONLY

General Information

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

USE RESTRICTIONS

- Not for use in Residential areas.
- DO NOT use in nurseries or rooms where infants, ill or aged persons are present.
- DO NOT place metering device directly over or within 8 ft of exposed food, dishes, utensils, food processing equipment and food handling or preparation.
- DO NOT install within 3 ft of air vents.
- Carefully follow directions for the dispenser unit when installing the dispenser and replacing cans or conducting maintenance.
- The maximum application rate for metered release devices is 0.00046 lb pyrethrin/1,000 ft³.

PRODUCT INFORMATION

This product is designed specifically for use in automatic metered dispensers. One dispenser per 6,000 ft³ is considered an average need, with adjustments made on specific conditions at place of use. The dispenser activates the metered valve once every 15 min. The effectiveness of this product will be noticeable within 1 hr after the dispenser is activated. Recommended use is for 24 hr control; but if < 24 hr control is desired, set the dispenser to start 1 hr before control is desired and run 1 hr after control is no longer needed. Factors such as airflow rate, size of space treated, humidity and room temperature affect insect activity and control. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed. It is suggested that the container be changed once a month (when operated on a 24 hr basis).
