For heavy infestations, move injector tip along at 1 ln ft/sec. For closed voids, calculate the void's cubic area and treat at the rate of 1 to 5 sec/3ft3. Several holes may be required in long-running voids.

SPOT TREATMENT: Use with the supplied actuator and injection tubes or other BASF equipment. Hold container upright while spraying. Direct nozzle approximately 12" from surface to be treated. Apply directly on insects in these locations when possible.
