

# **OUTDOOR TREATMENTS - TREATMENT FOR IN-GROUND SERVICE BOXES - FOR CLOSED VOIDS**

## General Information

### HOW TO USE BASF CRACK & CREVICE INJECTION SYSTEM

**CRACK & CREVICE TREATMENT:** Use with the supplied actuator and injection tubes or other BASF equipment. Inject into cracks and crevices or void spaces where insects may be harboring, living and breeding. Place injector tip into cracks, crevices, holes and other small openings. Release approximately 1 sec of product. For light infestations, move injector tip along cracks while treating at the rate of 3 In ft/sec. For heavy infestations, move injector tip along at 1 In ft/sec. For closed voids, calculate the void's cubic area and treat at the rate of 1 to 5 sec/3ft<sup>3</sup>. Several holes may be required in long-running voids.

**SPOT TREATMENT:** Use with the supplied actuator and injection tubes or other BASF equipment. Hold container upright while spraying. Direct nozzle approximately 12" from surface to be treated. Apply directly on insects in these locations when possible.

## Limitations, Restrictions, and Exceptions

### OUTDOOR TREATMENTS

**TREATMENT FOR IN-GROUND SERVICE BOXES:** Ants, Centipedes, Clover Mites, Cockroaches, Crickets, Earwigs, Millipedes, Scorpions, Silverfish, Sowbugs, Spiders (such as Black Widow and Brown Recluse) and Springtails. Use BASF spray actuator with injection tube to treat open boxes and exposed surfaces. DO NOT contact any electrical wiring or mechanical parts of meter.
