

FOLIAR APPLICATION - FIELD, ROW, VEGETABLE CROPS - AERIAL APPLICATION

General Information

General Information

BRANDT SEQUESTAR CORN MIX is a fully chelated solution designed specifically for the prevention and/or correction of micro-nutrient deficiencies in corn, but may be used on all crops as a part of a balanced fertility program.

Mixing and Handling Instructions

Put 1/3 to 2/3 of total required water volume in tank. Add adjuvants, other fertilizers and pesticides if desired and agitate until thoroughly mixed. Add recommended amount of this product and agitate until mixed. Fill tank with remainder of water and buffer to pH 6-6.5. Caution: Check chemical mixture compatibility using a jar test prior to application.

Limitations, Restrictions, and Exceptions

FOLIAR APPLICATION: Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

Field, Row, Vegetable Crops: For aerial applications, use 1/2-1 pint per acre in at least 10 gallons of water.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil or plant tissue test recommendation to monitor specific levels of micronutrients and maintain these levels for optimum plant growth.
