

TURF - ROUGHS - LIGHT

General Information

A green spray indicator for turf use

- Improves spray accuracy
- Dissipates under sunlight or moisture
- Non-toxic, biodegradable formula

Directions for Use

Application tips: Flat fan spraying tips are recommended when applying Turf Mark Green. Increased volumes of spray solution should be used when Turf Mark Green is applied to hard-to-mark areas. Longer or thinner stands of turf or sod may be more difficult to mark due to the non-uniform marking surface. Increasing the total volume of spray solution applied to those areas should reduce marking difficulty.

Experimentation with the volume of spray solution and rate of Turf Mark Green applied per acre or area should allow each applicator to establish a rate that is functional and economical for each application. The more Turf Mark Green used, the darker the spray pattern.
