

ANTIFOAM

General Information

GENERAL INFORMATION

GUNDOWN MAX is formulated to aggressively neutralize foam in all pesticide and/or fertilizer tank mixes regardless of spray solution pH. Unlike ordinary defoamers, GUNDOWN MAX's unique blend of formulation aids and emulsifiers will not precipitate in low pH spray solutions, making it ideal for use with all glyphosate formulations. For use with Enlist Duo: Enlist Duo may only be tank-mixed with products that have been tested and found not to adversely affect the spray drift properties of Enlist Duo. A list of those products may be found at EnlistTankmix.com.

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE

Antifoam: Use GUNDOWN MAX to prevent foam formation by adding it to the spray solution first, while agitating, and before adding pesticides
