

SOIL APPLICATION

General Information

GENERAL INFORMATION:

MARINER b is designed as a foliar spray on tree, row and field crops. It can also be used as a soil-applied product on various soil types. This product, as a foliar spray, has an acid pH.

CAUTION: This product contains boron in amounts which could be excessive for some crops. Use of this product on any crops other than those recommended may result in serious injury to the crops.

Note: MARINER B is a highly effective formulation of Boron and requires much lower use rates than other Boron formulations.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION: Rate will depend upon level of deficiency. It is recommended that soil or tissue samples be performed to determine the deficiency.
