

TREE , VINE, BERRY CROPS - STRAWBERRIES

General Information

GENERAL INFORMATION

VINE BUILDER is designed to be used primarily for foliar application and for use on turf crops. It may be used as a starter fertilizer with seed or transplants. It may also be soil applied. VINE BUILDER is intended to be a supplement to a regular fertilizer program. Rates on this label are for foliar application. May be applied by ground or air.

Limitations, Restrictions, and Exceptions

Strawberries: Apply 2 to 3 quarts per acre at 2 week intervals beginning at pre-bloom and continuing throughout the season.
