

TREE , VINE, BERRY CROPS - CITRUS

General Information

GENERAL INFORMATION

VINE BUILDER is designed to be used primarily for foliar application and for use on turf crops. It may be used as a starter fertilizer with seed or transplants. It may also be soil applied. VINE BUILDER is intended to be a supplement to a regular fertilizer program. Rates on this label are for foliar application. May be applied by ground or air.

Limitations, Restrictions, and Exceptions

Citrus: Use 4 to 6 quarts per acre at early bud stage, prior to bloom, and again at early fruit set and at fruit size. Do not combine with oils.
