

FIELD CROPS - BARLEY, WHEAT, SMALL GRAINS

General Information

GENERAL INFORMATION

VINE BUILDER is designed to be used primarily for foliar application and for use on turf crops. It may be used as a starter fertilizer with seed or transplants. It may also be soil applied. VINE BUILDER is intended to be a supplement to a regular fertilizer program. Rates on this label are for foliar application. May be applied by ground or air.

Limitations, Restrictions, and Exceptions

Barley, Wheat, Small Grains: Apply 2 to 3 quarts per acre when plant is 10 inches, and again prior to heading out.
