

FIELD CROPS - ALFALFA (SEED)

General Information

GENERAL INFORMATION

VINE BUILDER is designed to be used primarily for foliar application and for use on turf crops. It may be used as a starter fertilizer with seed or transplants. It may also be soil applied. VINE BUILDER is intended to be a supplement to a regular fertilizer program. Rates on this label are for foliar application. May be applied by ground or air.

Limitations, Restrictions, and Exceptions

Alfalfa (seed): Apply 3 to 4 quarts at pre-bloom and several more times at 3 week intervals.
