

## FIELD CROPS - COTTON

### General Information

#### GENERAL INFORMATION

VINE BUILDER is designed to be used primarily for foliar application and for use on turf crops. It may be used as a starter fertilizer with seed or transplants. It may also be soil applied. VINE BUILDER is intended to be a supplement to a regular fertilizer program. Rates on this label are for foliar application. May be applied by ground or air.

#### Limitations, Restrictions, and Exceptions

Cotton: Apply 2 quarts per acre at first true leaf. Repeat at first square and again at 2-week intervals.
