

APPLICATION WITH IRRIGATION WATER: PIVOT, SPRINKLER, OVERHEAD AND SOLID SET IRRIGATION

Limitations, Restrictions, and Exceptions

APPLICATION WITH IRRIGATION WATER:

PIVOT, SPRINKLER, OVERHEAD AND SOLID SET IRRIGATION: For best results apply within 2 weeks of

planting and before flowering using 1 to 4 qts. per acre, or the dosage rates and timing recommended for crops

shown above. This product may be mixed with most liquid fertilizers or pesticides before injection. Use a backflow check valve to prevent material from backing into water system.
