

# **FOOD CONTACT SURFACE SANITIZATION - SANITIZING TABLEWARE**

## General Information

StorOx 2.0 works best when diluted with water with minimal levels of organic or inorganic materials, and with water having a neutral pH. Thoroughly rinse out tank with water before mixing concentrate. StorOx 2.0 will readily mix with clean, neutral water and does not require agitation.

StorOx 2.0 concentrate should not be combined or mixed with any other pesticide concentrates.

## Limitations, Restrictions, and Exceptions

### SANITIZING TABLEWARE

For sanitizing tableware in low to ambient temperature ware washing machines, inject StorOx 2.0 into the final rinse water using 2.5 fl. oz. of concentrate per gallon of water. Solution must contact tableware for a minimum of 5 minutes. To insure that the StorOx 2.0 concentration does not fall below 0.1%, periodically test the rinse solution with a suitable test kit and adjust the dispensing rate accordingly.
