

FOR BORON - DEMANDING CROPS - FORAGE LEGUMES - LOW TO VERY LOW SOIL TEST

General Information

ORGANIC STATEMENT

All Fertilizer Ingredients and soil or plant additives comply with requirements of the USDA National Organic Program (NOP) as specified in 7 CFR Part 205.

WARNING: Some crops may be injured by over application of boron.

Limitations, Restrictions, and Exceptions

For Boron - Demanding Crops: Boron deficiency is most likely to occur with alfalfa, beet, canola or forage brassicas and cole crops grown on sandy soils or soils low in organic matter.
