

# **LOX PLUS**

## General Information

### USE INFORMATION

LOX PLUS is a unique proprietary, easy-to-use blend of ammoniated salt solution, deposition aid polymers and drift retardant for use with translocating herbicides. It is specially formulated to use with herbicides that suggest or recommend the addition of 8.5 to 17 pounds of ammonium sulfate per 100 gallons of spray solution. This product will retard, but not totally eliminate drift.

### USE PRECAUTIONS

The degree of drift hazard varies with the type of pesticide, application conditions and vegetation near the sprayed area. Consult your local agricultural advisor. Remember, pesticide drift is no accident. Common sense and sound application technology must be followed when spraying pesticides.

### MIXING DIRECTIONS

Always mix this product in accordance with the instructions concerning adjuvants found on the herbicide label.

In the absence of specific mixing instructions, fill the spray tank one-half to two-thirds full with clean water. While the water is agitating, add tank-mix ingredients in the following order:

Always try a small sample batch before mixing a full tank.

1. This product
2. Additional ammonium sulfate (if needed)
3. Dry flowables, dispersible granules, water-soluble packets
4. Flowables
5. Water-soluble herbicides

6. Emulsifiable concentrate

7. Finish adding water to final volume

8. Maintain agitation while spraying to ensure a uniform spray mixture.

Limitations, Restrictions, and Exceptions

#### DIRECTIONS FOR USE

Always use this product in accordance with the instructions concerning additives found on the herbicide label. This product contains deposition polymers to mitigate drift. Under extremely hard water conditions, additional ammonium sulfate solution may also be required.
