

# **NON-SELECTIVE HERBICIDE FOR ANNUAL GRASSES AND WEEDS**

## Limitations, Restrictions, and Exceptions

### General Information

WEED ZAP is a contact, non-selective, broad spectrum, foliar-applied herbicide. This product will only control actively-growing emerged green vegetation. It controls both annual and perennial broadleaf and grassy weeds. This product does not translocate. It will affect only those plants that are coated with the spray solution.

### APPLICATION RATE TABLE

Mix 3 gallons of WEED ZAP concentrate per 100 gallons of spray water. Apply enough WEED ZAP to cover

the entire surface of the weed. Spray to the point of run off. The use of a spreader/sticker such as JH Biotech's Natural Wet may increase contact and efficacy of treatment.

### FINAL MIX VOLUME

1 Gallon : 4 fl. oz.

5 Gallons : 20 fl. oz.

10 Gallons : 40 fl. oz.

25 Gallons : 100 fl. oz.

Repeat application as necessary. Coverage is essential to establish control.

Off target application of WEED ZAP will result in damage to growing plants. Do not apply this product through the irrigation system.
