

SOYBEAN - SEED TREATMENT

Limitations, Restrictions, and Exceptions

SEED TREATMENT: CAPTAN 50/50 is a special powder formulation for treatment of corn and soybeans seed, prior to planting, for the temporary protection of germinating seeds and seedlings against organisms and seedling blight. This product provides 0.2 ounce of molybdenum per acre for plant nutrition and as an aid in the nitrogen fixation process of the soybean plant.

Do not use treated seed for food, feed or oil purposes.

KEEP PLANTER PLATES CLEAN: Grease or oil on plates can cause clogging.

NOTE: This product has been mixed with graphite as an aid in safe handling and lubrication of equipment.
