

COMPLEXED MICRONUTRIENT FOR CORRECTION OF ZINC AND MANGANESE DEFICIENCIES IN VARIOUS PLANTS

General Information

GENERAL INFORMATION

KickStand ManZinc is compatible with polyphosphate and orthophosphate fertilizer solutions.

KickStand ManZinc is a micronutrient solution containing 2% zinc and 2% manganese. It is designed to correct deficiencies of manganese and zinc.

KickStand ManZinc can be applied in the soil to vegetables, fruits, row crops, deciduous fruit and nut trees, and commercial turf and ornamentals.

APPLICATION AND MIXING GUIDE

Rate of application is 1 gallon per acre. KickStand Zinc may be mixed directly into a fertilizer solution without pre-dilution of water. The timing of applications are dependent on local conditions and should always be made as a result of soil and/or plant tissue analysis. For specific use recommendations, consult your local Helena Chemical Company representative or your local agricultural extension agent.

KickStand ManZinc may be applied by ground application. Use enough carrier for thorough uniform coverage of the soil.
