

COTTON - HIGH RATE SINGLE OR SPLIT APPLICATIONS - SECOND

General Information

GENERAL INFORMATION

HELENA PGR-IV PLUS applications are designed to promote root growth, square retention and boll fill.

Refer to COMPATIBILITY section for tank-mixing with other products. The following table gives the minimum and maximum amounts of diluent to be used to apply the amount of HELENA PGR-IV PLUS per acre specified in the use rate tables.

Applicators should use a dilution rate that achieves thorough coverage of available plant foliage up to the point of runoff.

Limitations, Restrictions, and Exceptions

COTTON

Second

Use lower rate if the early bloom application was made. Apply higher rate when making a single application.

Restrictions and Limitations

- For use on short-staple and long-staple (Pima) cotton only.
- Do not graze or feed cotton forage to livestock.
- Do not plant another crop within 75 days after last treatment.
