

FERTIGATION

General Information

GENERAL INFORMATION

Hydra-Hume is designed for soil and foliar applications. Hydra-Hume can be applied 5-6 times during the growing season. Apply at no more than 3 gallons per application. Products containing humic acids, such as Hydra-Hume, may aid in the uptake of micronutrients.

Limitations, Restrictions, and Exceptions

FERTIGATION: Inject Hydra-Hume at 1 - 2 gallons per acre 2 - 6 times in season alone or in combination with fertilizers. Superior results from fertilizers injected into irrigation water can be achieved with 1 gallon of Hydra-Hume mixed with 10 - 20 gallons of liquid fertilizer. Substitute TraFix for Hydra-Hume when fertilizer solutions are less than pH 5.5.
