

VEGETABLES CROPS, ROW CROPS, ETC.

General Information

GENERAL INFORMATION

Hydra-Hume DG “Coated” is a leonardite mix, rich in humic acids containing perhaps the highest concentration of humic acids available from raw leonardite. Products containing humic acids, such as Hydra-Hume DG “Coated”, may increase uptake of micronutrients.

SUGGESTED DIRECTIONS

Hydra-Hume DG “Coated” can be applied to all crops including: vegetable crops, row crops, field crops, trees and vines.

Apply 10 - 40 pounds per acre per year. May be applied anytime during the year.
