

RECOMMENDATIONS FOR USE WITH CONVENTIONAL SPRAYERS

General Information

GENERAL INFORMATION

INJECTOR is designed to promote better absorption of irrigation water into the soil.

INJECTOR enhances the infiltration and penetration of water whether applied with conventional spray rig equipment, or through the irrigation system itself.

Limitations, Restrictions, and Exceptions

RECOMMENDATIONS FOR USE WITH CONVENTIONAL SPRAYERS:

Apply at a rate of 1 oz. per 1000 sq. ft. in a minimum of 1 gallon of water (32 mL/4 L water/100 m²).

Irrigate as normal. Repeat application each month or as required during the growing season. INJECTOR can be applied without watering-in afterward. (Irrigate before next mowing or leave baskets off).
