

ADJUVANT FOR SPRAY APPLICATIONS IN VEGETATION MANAGEMENT AND FORESTRY

General Information

GENERAL INFORMATION

NXS is a specialized adjuvant designed to enhance the efficacy and application of pesticides used in forestry and vegetation management.

NXS improves both deposition and absorption of most pesticide and plant nutritional sprays.

DIRECTIONS FOR USE

FOR USE WITH PRODUCTS REGISTERED FOR: AGRICULTURAL, FORESTRY, AQUATICS, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY, TURF, AND OTHER USES.

The addition of a spray adjuvant to some crop pesticide, pesticide combinations, and/or fertilizers may cause phytotoxicity to the foliage and/or fruit of susceptible plants or non-targeted vegetation. Prior to the application of NXS to a spray mix, the user or applicator must have experience with the combination or must have conducted a phytotoxicity trial.

Limitations, Restrictions, and Exceptions

USE RATES

A general use rate of 1.0% by volume, or 4 qts. per 100 gallons of spray mix. Higher or lower use rates may be needed for specific applications. Contact your Helena Chemical Company representative for details.
