

## **GARDEN & LANDSCAPE - TREES AND SHRUBS**

### General Information

#### GENERAL INFORMATION

SCATTER is a blend of nonionic wetting agents impregnated onto an inert organic carrier. This results in a dry granular formulation that provides equal performances as liquid products when used at recommended rates. SCATTER can be applied safely at full rates in both spring and summer. SCATTER is particularly useful for treating small areas of difficult to wet soil. SCATTER also contains agents to prevent foaming problems.

### Limitations, Restrictions, and Exceptions

#### GARDEN & LANDSCAPE

Trees and Shrubs: SCATTER 6 lbs./1000 square feet uniformly form drip line to trunk. Repeat every 3 to 4 months.

Refer to table of the Label for measuring Scatter. SCATTER weight to volume measures are suggestions only.
