

SMALL GRAINS

General Information

METHOD OF APPLICATION

Agitate the container thoroughly before use. Care should be taken to calibrate the machine accurately, to obtain an evenly applied correct dosage.

MIXABILITY

Teprosyn products may be mixed with many agrochemical seed treatments. Contact PHOSYN for specific information.

STORAGE OF TREATED SEED

Seed treated with Teprosyn Zn/P should be drilled in season of application. Although Teprosyn Zn/P should not have any effect on storage life of treated seed, the subsequent germination and performance of such seed may be adversely affected by physical storage conditions. No liability can therefore be accepted for the performance of stored, treated seed.
