

RECOMMENDED CROPS

General Information

GENERAL INFORMATION

Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by crops or other intended plants.

TRACITE MANGANESE 5% is a complexed micronutrient designed for foliar or soil application. It is recommended for use as an additive in dry or liquid fertilizers and is compatible with most of the herbicides, insecticides and agricultural chemicals that can be utilized in combination with liquid fertilizers. TRACITE MANGANESE 5% may not be compatible with some liquid fertilizer formulations. A pre-mix “jar test” is recommended prior to mixing with liquid fertilizers to check compatibility.

The addition of TRACITE MANGANESE 5% to water will decrease alkaline hydrolysis associated with all organo-phosphate insecticides.

Limitations, Restrictions, and Exceptions

NOTE: TRACITE MANGANESE 5% cannot be used in liquid fertilizers which contain ortho-phosphates. DO NOT MIX WITH CATIONIC PESTICIDES.

RECOMMENDED CROPS

TRACITE MANGANESE 5% can be applied to the following crops: Vegetables, fruit, row crops, deciduous fruit and nut trees, citrus trees and commercial turf and ornamentals.

APPLICATION AND MIXING GUIDE

Rates and timing of applications are dependent on local conditions and should always be made as a result of soil and/or plant tissue analysis and in conjunction with your local agricultural authority.

FOR USE IN WISCONSIN: TRACITE MANGANESE 5% can also be applied to the following crops commonly grown in Wisconsin and requiring a medium to high level

of manganese: Barley; Beans, lima, navy; Beet; Broccoli; Brussels sprouts; Cabbage; Canola; Carrots; Cauliflower; Celery; Corn, field, sweet; Cucumber; Lettuce; Oats; Onion; Pasture, bluegrass; Pasture, tall grass; Peas, canning; Peas, chick, field, cow; Potato; Radish; Sod; Sorghum, grain; Sorghum, sudan; Soybean; Spinach; Tomato; Triticale; Wheat.

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

TRACITE MANGANESE 5% may be applied by ground or aerial application. Use enough water for thorough coverage of foliage or soil. Thorough coverage is necessary for best results and the addition of a nonionic surfactant such as INDUCE is recommended.
