

BASIC BLEND SPRAY ADJUVANT

General Information

GENERAL INFORMATION

TransActive HC is a unique and patented blend of surfactants, humectants, ammonium salts and alkaline buffers that are designed to enhance the activity and deposition of spray applications. When used at recommended rates, TransActive HC is a basic blend type adjuvant that may be used as a replacement for nonionic surfactants, crop-oil concentrates, methylated seed-oils, and nitrogen-fertilizer-based spray adjuvants. It is particularly effective with ACCENT, PURSUIT, RAPTOR and other sulfonyleurea/Imidazolinone based herbicides. DO NOT use this product with ASSERT.

DIRECTIONS FOR USE

FOR USE WITH PRODUCTS REGISTERED FOR: AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY, TURF, AND OTHER USES. NOT FOR AQUATIC USE.

The addition of a spray adjuvant to some pesticides, pesticide combinations, and/or fertilizers may cause phytotoxicity to the foliage and/or fruit of susceptible crops or non-targeted vegetation. Prior to the addition of TransActive HC to a spray mix, the user or applicator must have experience with the combination or must have conducted a phytotoxicity trial.

USE RATES:

A general use rate of 3 to 6 qts. per 100 gallons of spray or 0.75 to 1.50% by volume is recommended. Before mixing the spray solution, it is recommended that a compatibility test be performed in a small container. For water volumes below 5 gpa, use 2% v/v (2 gal. per 100 gal. spray mixture).
