

NURSERY AND ORNAMENTALS: TRANSPLANTING

General Information

Nebula® 2-3-3 is a liquid fertilizer with iron & manganese.

GENERAL INFORMATION:

Nebula 2-3-3 is a specially formulated liquid fertilizer containing Nitrogen, Available Phosphate, Potassium, Iron and Manganese. Nebula 2-3-3 is designed for feeding both the turf and the Soil Food Web. The Soil Food Web includes all the bacteria, fungi, algae, protozoa and other organisms that improve the soil and make productive root zones.

SHAKE WELL BEFORE USING

GENERAL RECOMMENDATIONS

Apply Nebula weekly or bi-weekly as a stand-alone product or as a tank mix with other products as often as possible to maintain root zone productivity.

Limitations, Restrictions, and Exceptions

Transplanting: Apply 2 gallons. Dilute with 100 gallons of water and apply to root ball or back-fill at the time of planting. Apply 1 gallon of solution per 1 inch of trunk caliper.
