

# **FAIRWAYS, LAWNS, ATHLETIC FIELDS - GROWING SEASON**

## General Information

### GENERAL INFORMATION

PROMATE SCATTER is a blend of nonionic wetting agents impregnated onto an inert organic carrier. This results in a dry granular formulation that provides equal performance as liquid products when used at recommended rates. PROMATE SCATTER can be applied safely at full rates in both spring and summer.

PROMATE SCATTER is particularly useful for treating small areas of difficult to wet soil. PROMATE SCATTER also contains agents to prevent foaming problems.

### Limitations, Restrictions, and Exceptions

#### FAIRWAYS, LAWNS, ATHLETIC FIELDS

PROMATE SCATTER 9-12 lbs./1000 square feet every 6 months.

Growing Season: PROMATE SCATTER 3 lbs./1000 square feet or 140 lbs./acre.

Reapply at 3-4 month intervals.

NOTE: PROMATE SCATTER can enhance uniform turf seed grass germination by improving water availability and improving drainage. Scatter 1½ lbs./1000 square feet during soil preparation for seeding. Then continue applications according to instructions noted in Fairways, Lawns, and Athletic Fields section of label.
